Art Unit: 1761

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dunn et al (U.S. Patent No. 5,614,243) in view of Asher et al (U.S. Patent 5215777) for the reasons set forth in rejecting the claims in the last Office action. The amendments to the claims are not seen to influence the conclusion of unpatentability previously set forth.

Dunn et al disclose a starch based texturizing agent and process for preparing comprising a combination of 1 to 30% starch (e.g. corn starch), 2 to about 10% gums (i.e. xanthan gum, gum arabic, carrageenan, locust bean gum, guar gum and combinations thereof), and whey protein, where the starch is heated prior to mixing (see entire document, especially claims 1-3, 5, 9, 10, and 25). Dunn et al also teach the use of the texturizing agent in low fat and fat-free foods, including dairy products such as yogurt and cheese (see abstract).

The claims differ as to the specific use of whey protein concentrate.

Asher et al disclose a texturizing agent, for use in low or non fat ice cream, and process of preparing comprising heating of the mixture and the use of about 5 to about 15% whey protein concentrate (see entire document).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use whey protein concentrate as taught by Asher et al in that of Dunn et al because whey protein concentrate is a conventional source of whey protein.

Applicant's arguments filed September 27, 2004 have been fully considered but they are not persuasive.

Applicant argues that the prior art does not teach that a dairy product containing the aqueous solution can be packaged using a hot fill process while maintaining a smooth texture, and that the references are not combinable.

Applicant does not claim a hot filled dairy product, but merely recites it as a possible intended use. This does not define over that of the prior art.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, both references teach the use of whey products in dairy compositions. Furthermore, Asher et al is merely cited to teach the conventional use of whey protein concentrates.

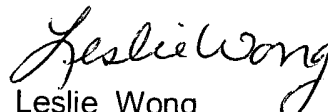

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
